23. Problem: (use additional Sheets if necessary)
The documentation for the new CDROM COTs product (kpar) suggests that the ISO9660 format (without any extensions) which is universally readable (pc:dos, windows; unix:all variants; mac) seems to have it's limitations. To support filenames which often exceed 20 characters and use 'unconventional' filenames like :SCXXXX (even joliet windows extensions will have problems with the colon) and dispite our intention to support all formats, we are limited to using ISO9660 with RockRidge extensions (aka unix filesystem).

24. Proposed Solution: (use additional sheets if necessary)
Update the ticket RS_6A_01 (Ops Concept and Test Criteria), which was previously entered in the VDB, to reflect that only ISO9660 format with Rock Ridge extensions will be supported on CD ROM.

25. Alternate Solution: (use additional sheets if necessary)

26. Consequences if Change(s) are not approved: (use additional sheets if necessary)
CDROM file naming problems

27. Justification for Emergency (If Block 15 is "Emergency"):
